DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on December 30, 2002 have been fully considered but they are not persuasive. The applicant argues that Bonutti's invention is a tool for removing percutaneous tissue not a tool for directing bone replacement material.

It has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

The intended use statements are not given any patentable weight in this instance, for example "for deflecting bone replacement material".

Bonutti also states that the opening or closing of the tube is simply a matter of design choice since it depends on where the invention is going to be used (Refer to column 7 lines 55-67).

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3743

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
